3. USABILITY TEST SCRIPTS, SCENARIOS, AND TASKS

SCENARIO:

You just finished a lecture and have 2 hours to waste before the next one. It's Thursday and this week you have not visited the gym despite telling yourself you would exercise at twice a week. A couple of days ago you got a new app that promised to help you find exercise partners to keep you motivated while reaching your fitness goals. You signed up but never opened it again. Now is your chance to see what this new app has to offer...

TASK:

USE THE APP TO:

Find someone to train with on the two hours you have free.

4. MINOR EXTRA TESTS

- How does the user interact with the notification bubble?
- Where would the user go to create a new event?
- How would the user navigate the map?
- What does the user expect from clicking the user marker?
